HELPFUL TIPS

Photos, Graphics and Electronic Files
- Please fill out a customer checklist when submitting files electronically.
- Scan and save all photographs in TIF format at a resolution of 300 dpi.
- Save line art in TIF or EPS format at a resolution of 600 dpi.
- You may submit your printing requests via email with a PDF of your document attached.

Fonts
- Place all fonts used in your document in a “fonts” folder on your disk.

Proofing
- Please proofread carefully.

Mailing Addresses
- Always use the addressee’s full name and the University of Florida PO Box for all internal campus mail.

Outgoing Mail
- Mail processing slips must be completed and accompany mailings.

Bulk Mail
- Contact us for assistance to ensure your mailing meets the U.S. Postal Service requirements.

About the Program

Our program is designed to interest Obstetrics and Gynecology Physicians. The course materials will provide the busy ObGyn practitioner with up-to-date, relevant, essential information that can be used immediately to improve patient care.

Learning Objectives

- Explore use of mesh in prolapse repairs; outcomes and complications; and review the FDA approval process.
- Define the effects of life-saving cancer curing therapies on fertility potential; reviewing options for male and female patients; and define barriers to treatment.
- To describe the key interventions to reduce the risk of postcesarean endometritis and wound infection and the risk of uterine scar dehiscence in a subsequent pregnancy.
- Review high risk obstetric care in international medicine; specifically the need for diagnostic skills based on clinical observation/examination...relatively unaided by laboratory/radiologic examination.
- Review criteria to identify opiate dependent patients, and the most effective way to provide acute pain relief for the narcotic dependent patient.
- Review the evidence and compare the techniques of laparoscopic management of endometriosis associated with pelvic pain.
- Review goals of academic medicine, and the barriers to success.
- Review the factors controlling fetal growth and causes of fetal growth retardation to create a management plan for pregnancies complicated with FGR.

Accreditation/Credits

Accreditation: The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit: The University of Florida College of Medicine designates this live activity for a maximum of 7 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Department of Behavioral Science & Community Health

The Department of Behavioral Science and Community Health is housed within the College of Public Health and Health Professions at the University of Florida, Gainesville, Florida.

[http://www.phhp.ufl.edu]
Bachelor of Health Science
Pre-Public Health

http://phhp.ufl.edu/academics/undergraduate/

The pre-public health track is designed to provide students with foundational skills for both individual and community based health care. Students gain public health knowledge before continuing on to graduate or professional school in a health care discipline or to work in a health setting.

Coursework includes the U.S. health care system, disease and disability, health-related research, communication skills, public health concepts, critical issues in public health, global public health, applied epidemiology, substance abuse and public health management and leadership. The service learning practicum, in which students conduct service projects in the community, is the culminating experience of the program.

Master of Public Health

http://bsch.phhp.ufl.edu/academics/master-public-health/

The Social and Behavioral Sciences (SBS) concentration is based on the assumption that health and health behavior are influenced by multiple psychological, behavioral, social and cultural factors.

Central to addressing health problems and eliminating health disparities and inequalities, these factors must be understood and addressed at multiple social-ecological levels (individual, interpersonal, organizational, community and population).

Through classroom instruction, research and field practice, MPH students in social and behavioral sciences explore the unique issues faced by diverse groups and populations and acquire skills to achieve social and behavioral change.

Doctor of Philosophy
Public Health

http://bsch.phhp.ufl.edu/academics/doctoral-program/

The PhD in Public Health-Social and Behavioral Sciences (SBS) is designed to develop advanced knowledge and skills in public health social and behavioral science theories and methods. Graduates pursue public health careers in research, academics, government, or related health organizations.

The Department of Behavioral Science and Community Health (BSCH) is one of nine academic departments housed in the College of Public Health and Health Professions at the University of Florida.
